

MOWINS Release 2.26- Revision 14 Risk Factor Changes

MOWINS Release 2.26 will contain changes for the following risk factors:

- Risk Factor 211 Elevated Blood Lead Levels
- Risk Factor 332 Short Interpregnancy Interval (formerly known as Closely Spaced Pregnancies)
- Risk Factor 601 Breastfeeding Mother of Infant at Nutritional Risk
- Risk Factor 602 Breastfeeding Complications or Potential Complications (Women)

Risk Factor 211 – Elevated Blood Lead Levels: The parameter for system assignment of this risk factor will change from “ ≥ 10.0 micrograms/deciliter” to “ ≥ 5.0 micrograms/deciliter”.

Risk Factor 332 – Short Interpregnancy Interval: The risk description will change from Closely Spaced Pregnancies to Short Interpregnancy Interval; the time frame will change from within 16 months of LMP start date to within 18 months of LMP start date; and will be based on live births only. In the past, all births were included.

The Pregnancy Health Information screen of the Pregnant participant, will have a “Live Birth within 18 months” checkbox added under the “Previous Pregnancy Information” section.

The screenshot displays the 'Pregnancy Health Information' screen for a pregnant participant. The interface includes a top navigation bar with tabs: 'Health Information', 'Nutrition Education', 'Referrals', 'Income History', 'Benefits History', and 'Appointments'. The 'Health Information' tab is active, showing various sections for data entry.

The 'Current Pregnancy Information' section includes checkboxes for 'Expecting Multiple Births', 'Planned C-section', 'Hypertension or Prehypertension', 'Has Not Received Prenatal Care', 'Requires Food Package III', 'Currently Breastfeeding Infant', and 'Currently Breastfeeding Child Over One'. It also features input fields for 'Diabetes Mellitus', 'Gestational Diabetes', 'Expected Delivery', 'LMP Start Date', 'Date Prenatal Care Began', 'Date Food Package III Verified', 'Breastfeeding Amount', and 'Date BF Verified'. On the right, there are input fields for 'Pre-pregnancy Height', 'Pre-pregnancy Weight', 'Pre-pregnancy BMI', and 'Age at Conception'.

The 'Previous Pregnancy Information' section contains input fields for 'Number of Pregnancies', 'Number of Live Births', 'Number of W/C Pregnancies', 'Number of Pregnancies 20 or more Weeks', and 'Last Pregnancy Ended'. A new checkbox, 'Live Birth within 18 Months', is highlighted with a red box. Below this, the 'Multivitamin Consumption' section has dropdown menus for 'Month Prior to Pregnancy' and 'During Pregnancy'.

The 'Cigarette Usage' section includes input fields for 'Per Day - 3 Months Prior to Pregnancy', 'Per Day - Current', a 'Smoking Change' dropdown, and a 'Household Smoking' dropdown. The 'Alcohol Intake' section has input fields for 'Drinks/Week - 3 Months Prior to Pregnancy' and 'Drinks/Week Current'.

The 'Any Pregnancy History' section at the bottom includes checkboxes for 'Low Birth Weight', 'Premature Birth', 'Fetal or Neonatal Loss or 2 or more Spontaneous Abortions', 'Gestational Diabetes', and 'Preeclampsia'.

On the right side of the screen, there is a vertical sidebar with a red box highlighting the 'Pregnancy Info' tab, which is currently selected.

The Postpartum Health Information screen of BF/NBF participants will include a “Live Birth within 18 months” checkbox under the “Any History Of” section.

The screenshot shows a software interface for postpartum health information. It includes various input fields for dates, weights, and medical history. The 'Any History Of' section at the bottom has three checkboxes: 'Gestational Diabetes', 'Preeclampsia', and 'Live Birth within 18 Months'. The 'Live Birth within 18 Months' checkbox is highlighted with a red rectangular box. On the right side, a vertical sidebar contains two labels: 'Postpartum Info' and 'Pregnancy Info', with the 'Pregnancy Info' label also highlighted by a red rectangular box.

The “Live Birth within 18 Months” checkbox will remain active and available to select throughout the entire certification period, not just during the Certification Guided Script, on both the Pregnant and Postpartum Health Information screens,

If the “Live Birth within 18 Months” checkbox is selected in the Pregnant or Postpartum Health Information screens, RF332 will system assign.

The “Live Birth within 18 Months” checkbox must be checked for all women who meet this qualification.

Risk Factor 601 Breastfeeding Mother of Infant at Nutritional Risk: The risk factor has been revised to include prenatal women who are currently breastfeeding. This Risk Factor will system assign to a Pregnant woman **only** if the “Currently Breastfeeding Infant” checkbox is selected and the Breastfeeding Amount and Date BF verified drop-down boxes are completed on the Woman Health Information screen.

The screenshot shows the 'Woman Health Information' screen. It contains several sections with checkboxes and input fields. In the 'Current Pregnancy Information' section, the 'Currently Breastfeeding Infant' checkbox is selected. Below it, the 'Breastfeeding Amount' and 'Date BF Verified' drop-down boxes are visible. The 'Previously Pregnant Information' section is partially visible at the bottom.

.Risk Factor 601 will continue to system assign to Breastfeeding women.

Risk Factor 602 Breastfeeding Complications or Potential Complications (Women):

The risk factor has been revised to include prenatal women who are currently breastfeeding and have complications or potential complications related to breastfeeding an infant.

This risk factor can be CPA assigned to Pregnant women if either the Currently Breastfeeding Infant or Currently Breastfeeding Child checkbox is selected.

Risk Factor 602 will continue to CPA assigned to Breastfeeding women.

NOTE: Risk factors 211 and 332 will assign more frequently due to these changes and could system assign to existing certifications if the current data meets the new parameters.
